Certificates and Licenses

- **STN EN ISO 9001** - Quality Management System
- **STN EN ISO 14001** - Environmental Management System
- **STN EN ISO 45001** - Occupational Health and Safety Management System
- **STN EN ISO 3834-2** - Welding Process Quality Management System
- **STN EN 1090-2** - Execution of Steel Structures to **EXC1**, **EXC2** and **EXC3** Execution Classes
- **DIN EN ISO 3834-2** - System for Pressure Equipment Manufacturing and Assembly according to **EN13445 / EN 13480 / EN 12952** and Directive **2014/68/EU**, Annex I, Abs. 3.1

The company is authorized to perform assembly, reconstruction, repairs, maintenance, technical inspections and specialized tests of the following:

- gas equipment
- pressure equipment
- electrical equipment
- lifting equipment

Production

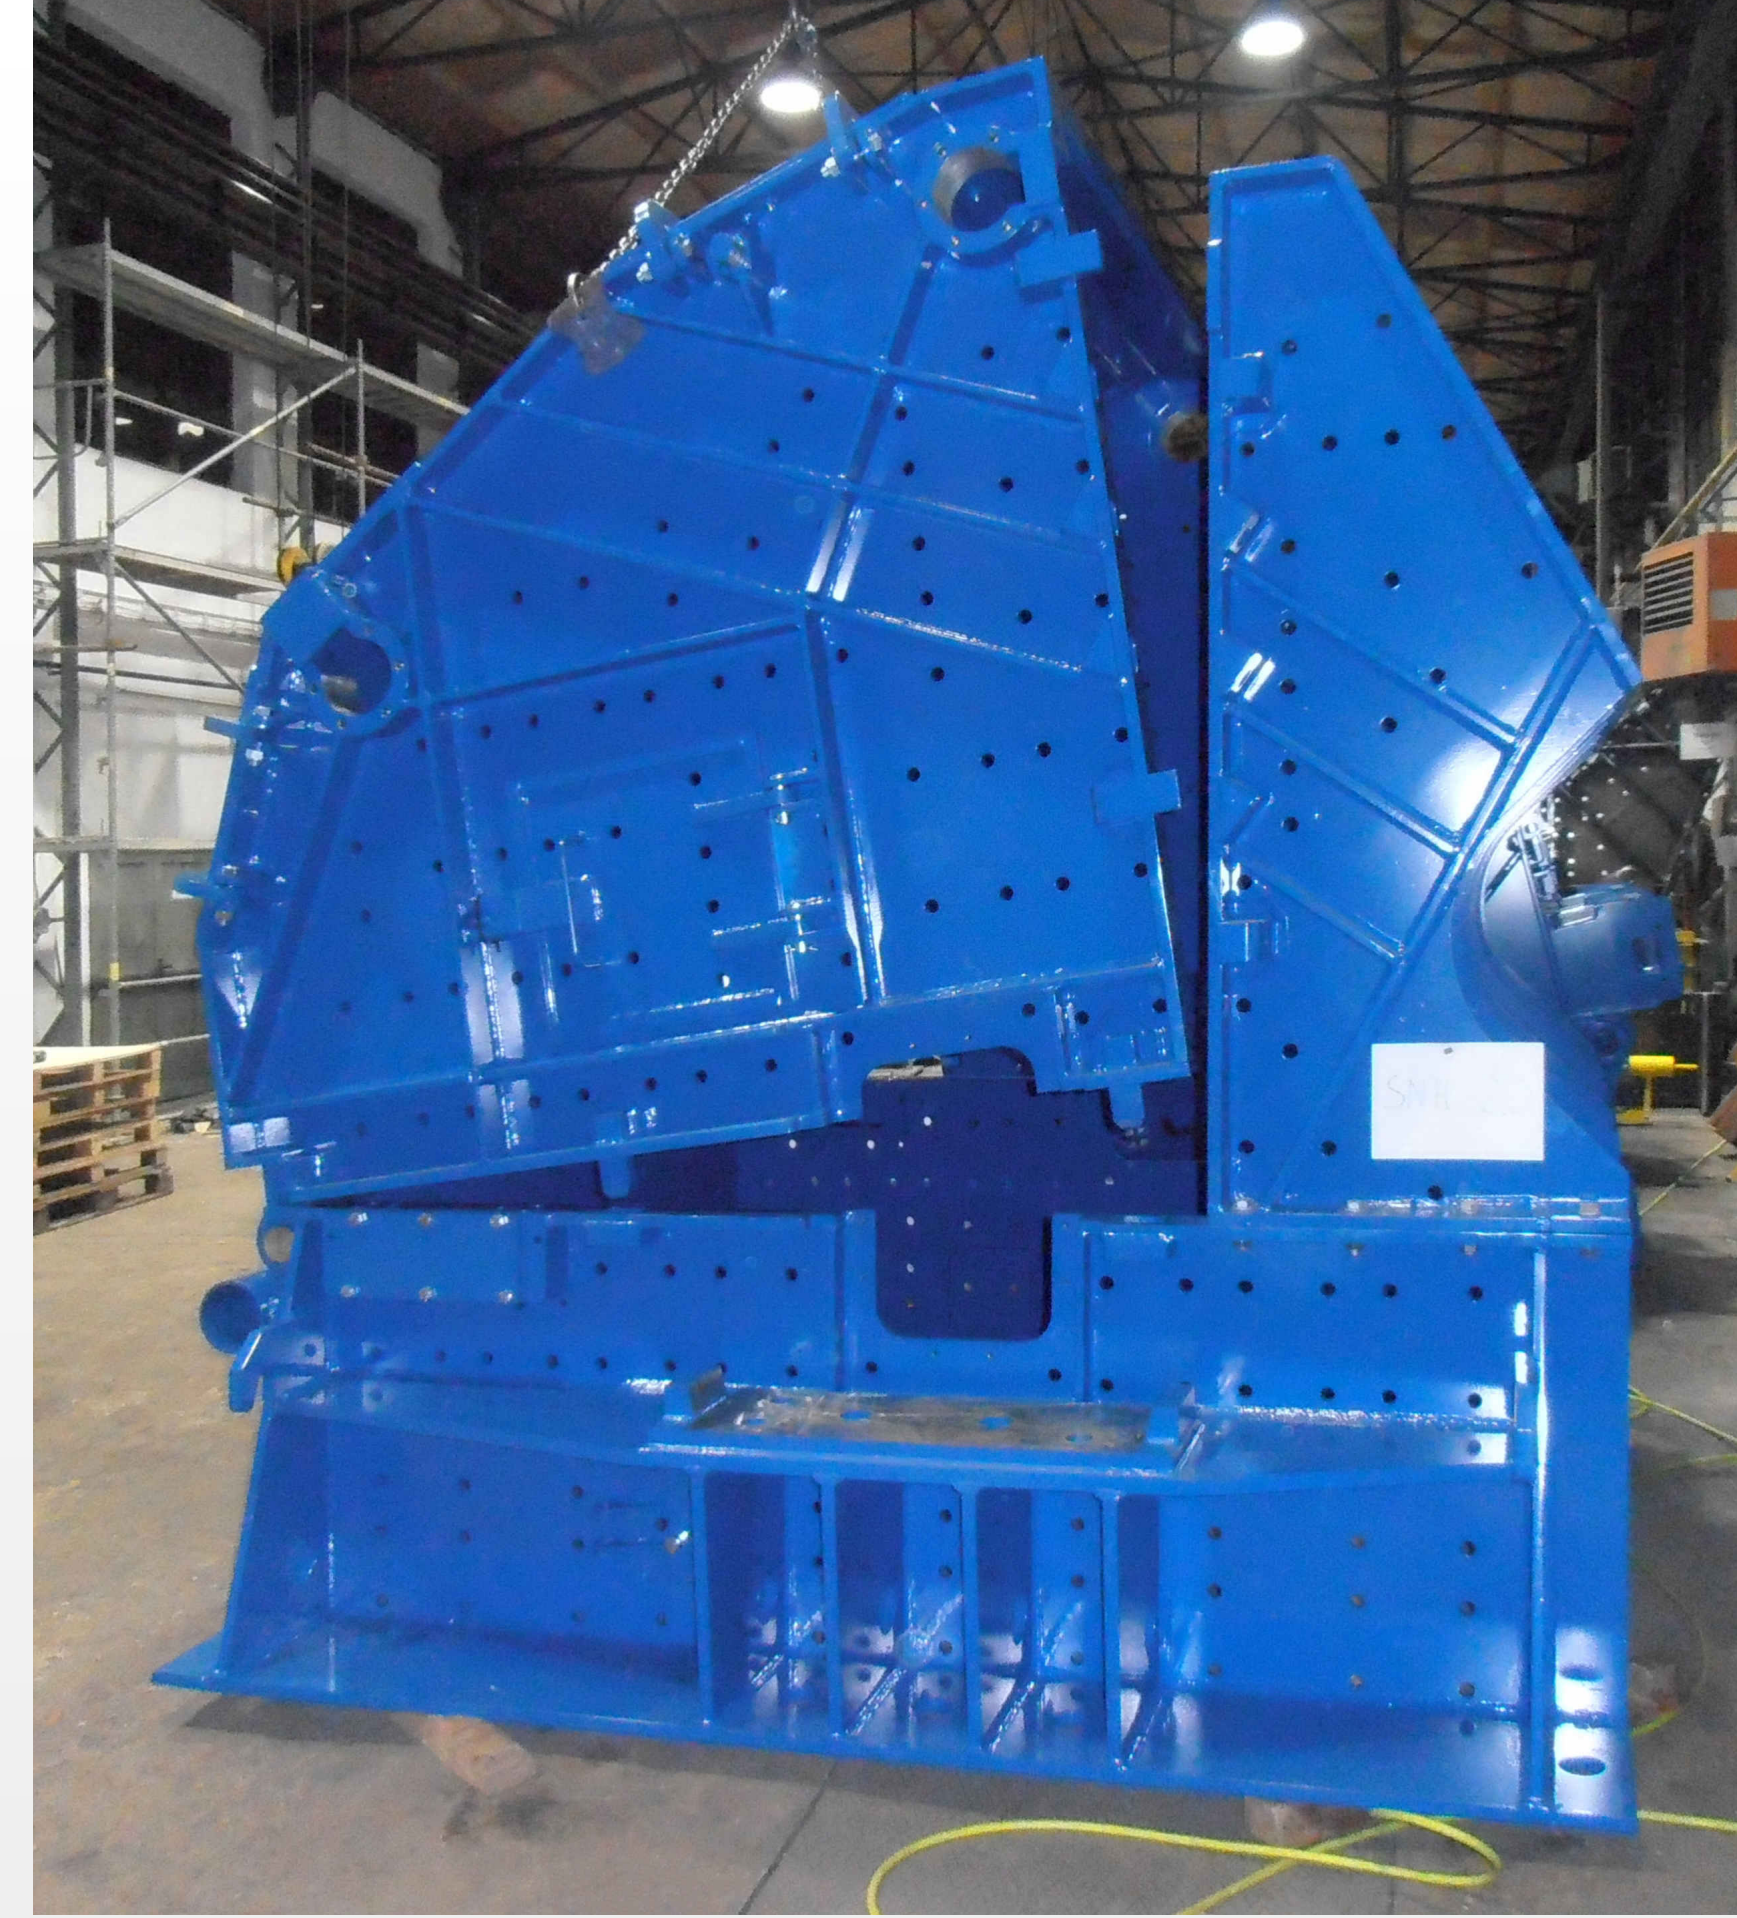

We offer comprehensive services in machine engineering and metal processing:

- locksmith and welding work
- metalwork
- production of welded parts, machines and equipment
- production of steel structures for industry and construction
- platforms, footbridges and other locksmith elements

Production

- production area of more than **12 000 m²**
- open-air warehouse areas of more than **10 000 m²**
- bridge cranes with a capacity of up to **40 t**
- we process approximately **300 t** of metallurgical material per month

Delivery and Assembly

- we assemble products of our production
- we provide the final surface treatment within the assembly
- the finished products are tested, transported to the place of delivery and run in trial operation
- we provide a guarantee for the equipment assembled by our company and we provide regular maintenance of the equipment according to requirements

Service and Technical Inspections

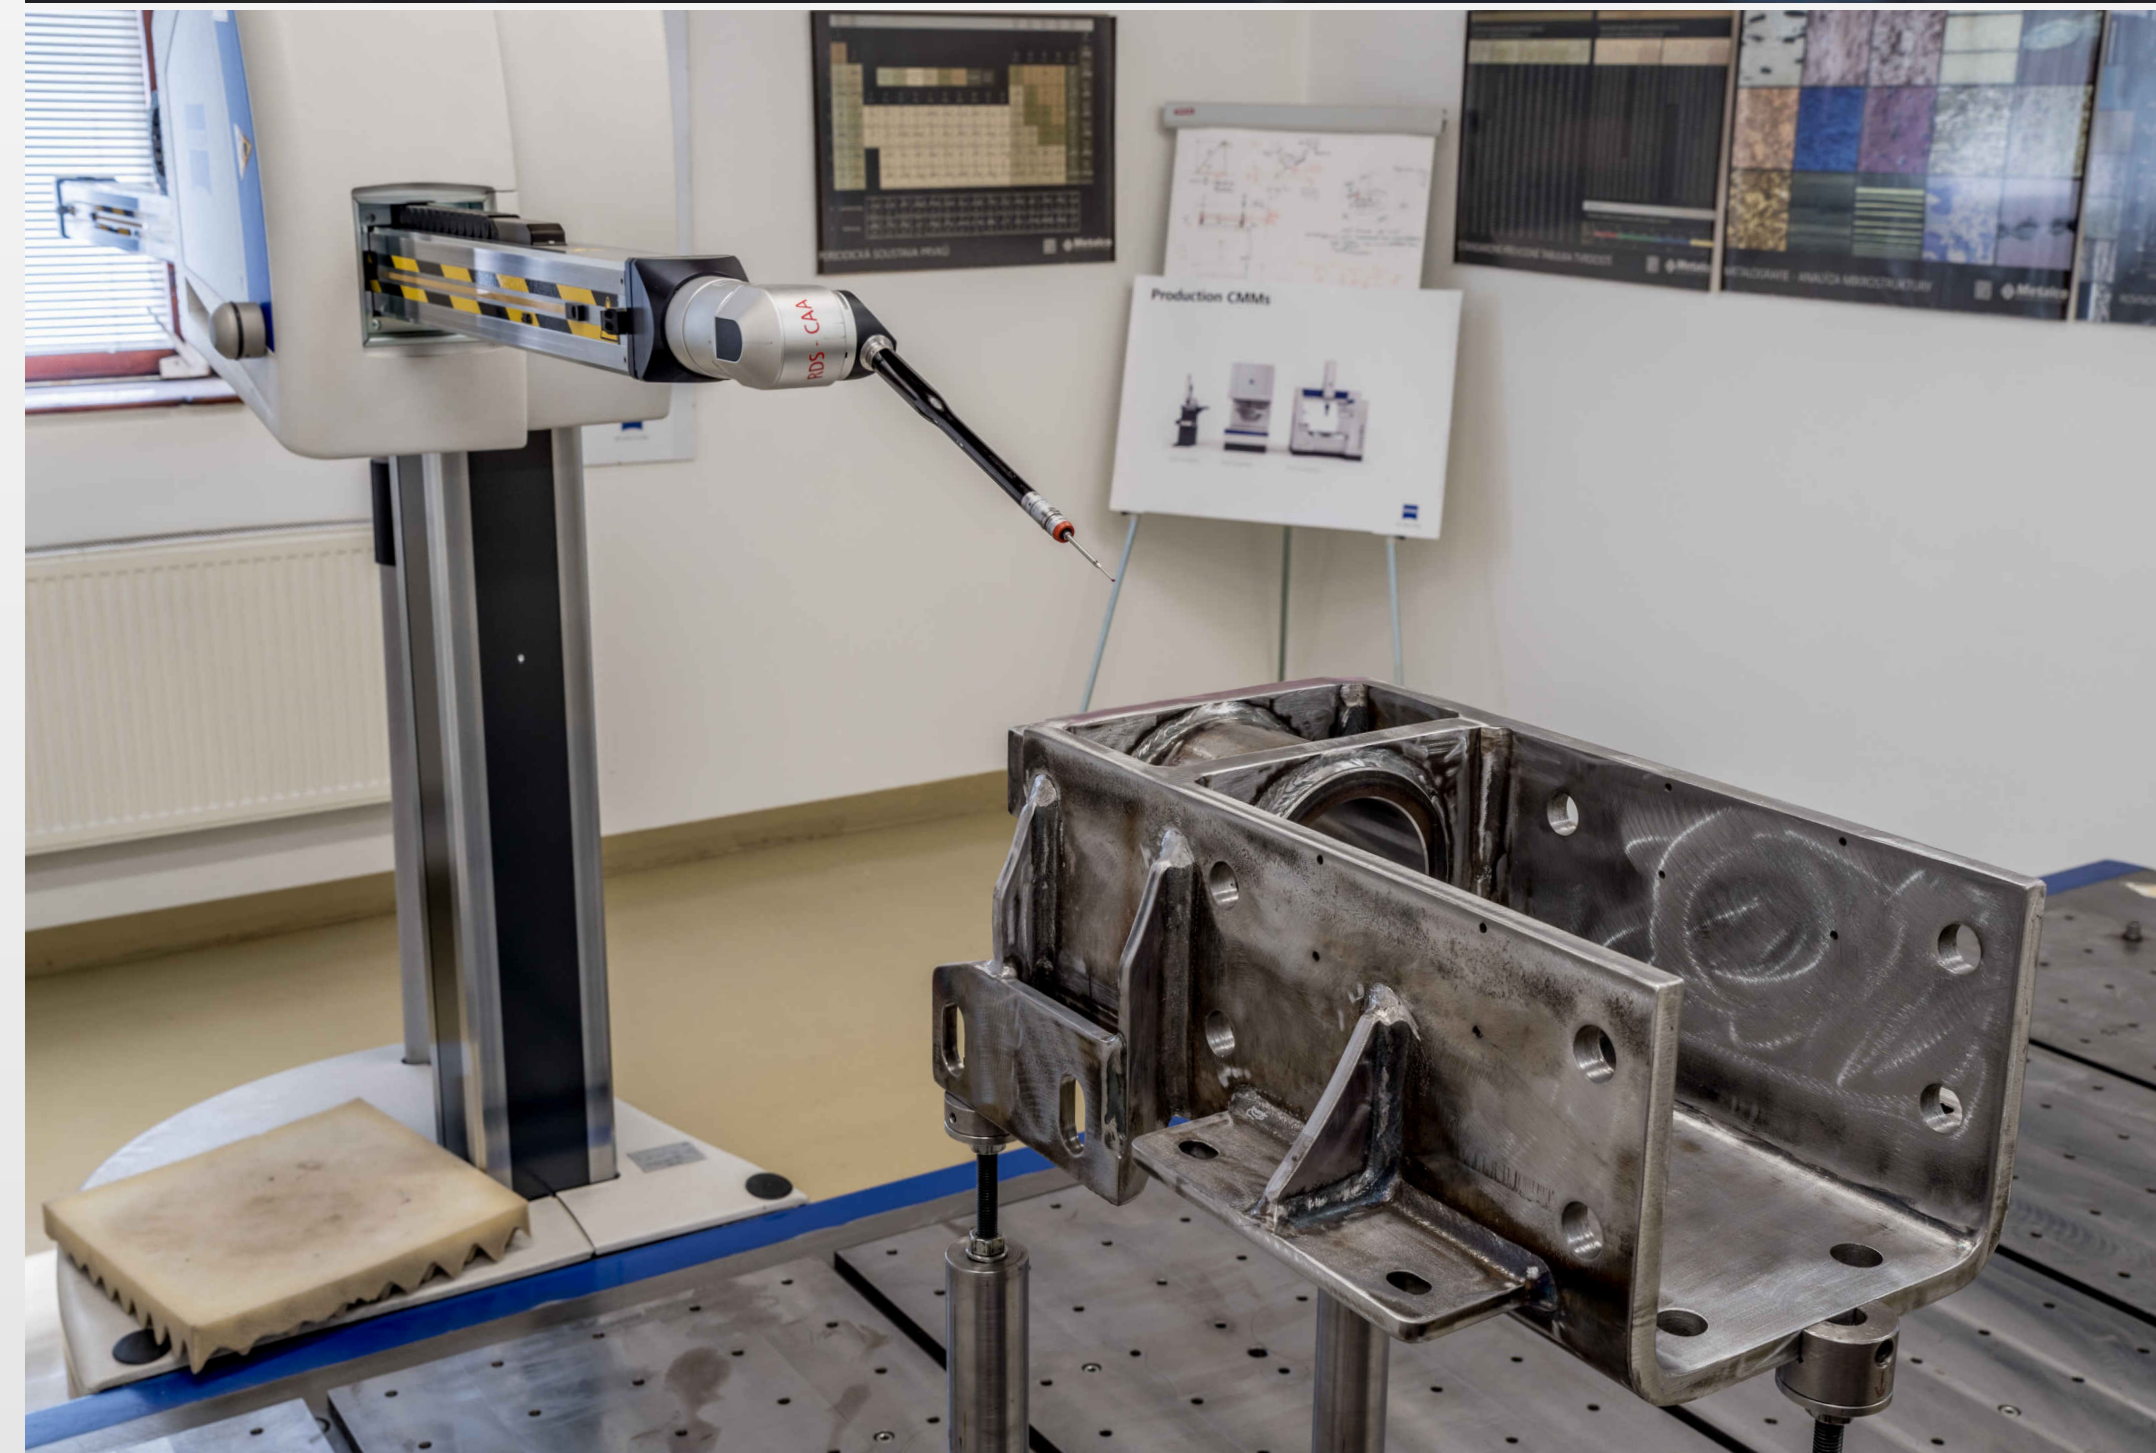

We are particular about the **quality** of production and services, therefore we provide guarantee for equipment assembled by our company.

Our employees are able to act operatively in the event of emergency repairs of technological equipment.

Service and Technical Inspections

- performed by our trained staff
- directly during production
- directly on the customer's equipment

Surface Treatment

- blasting
- wet painting
- powder coating

Surface Treatment

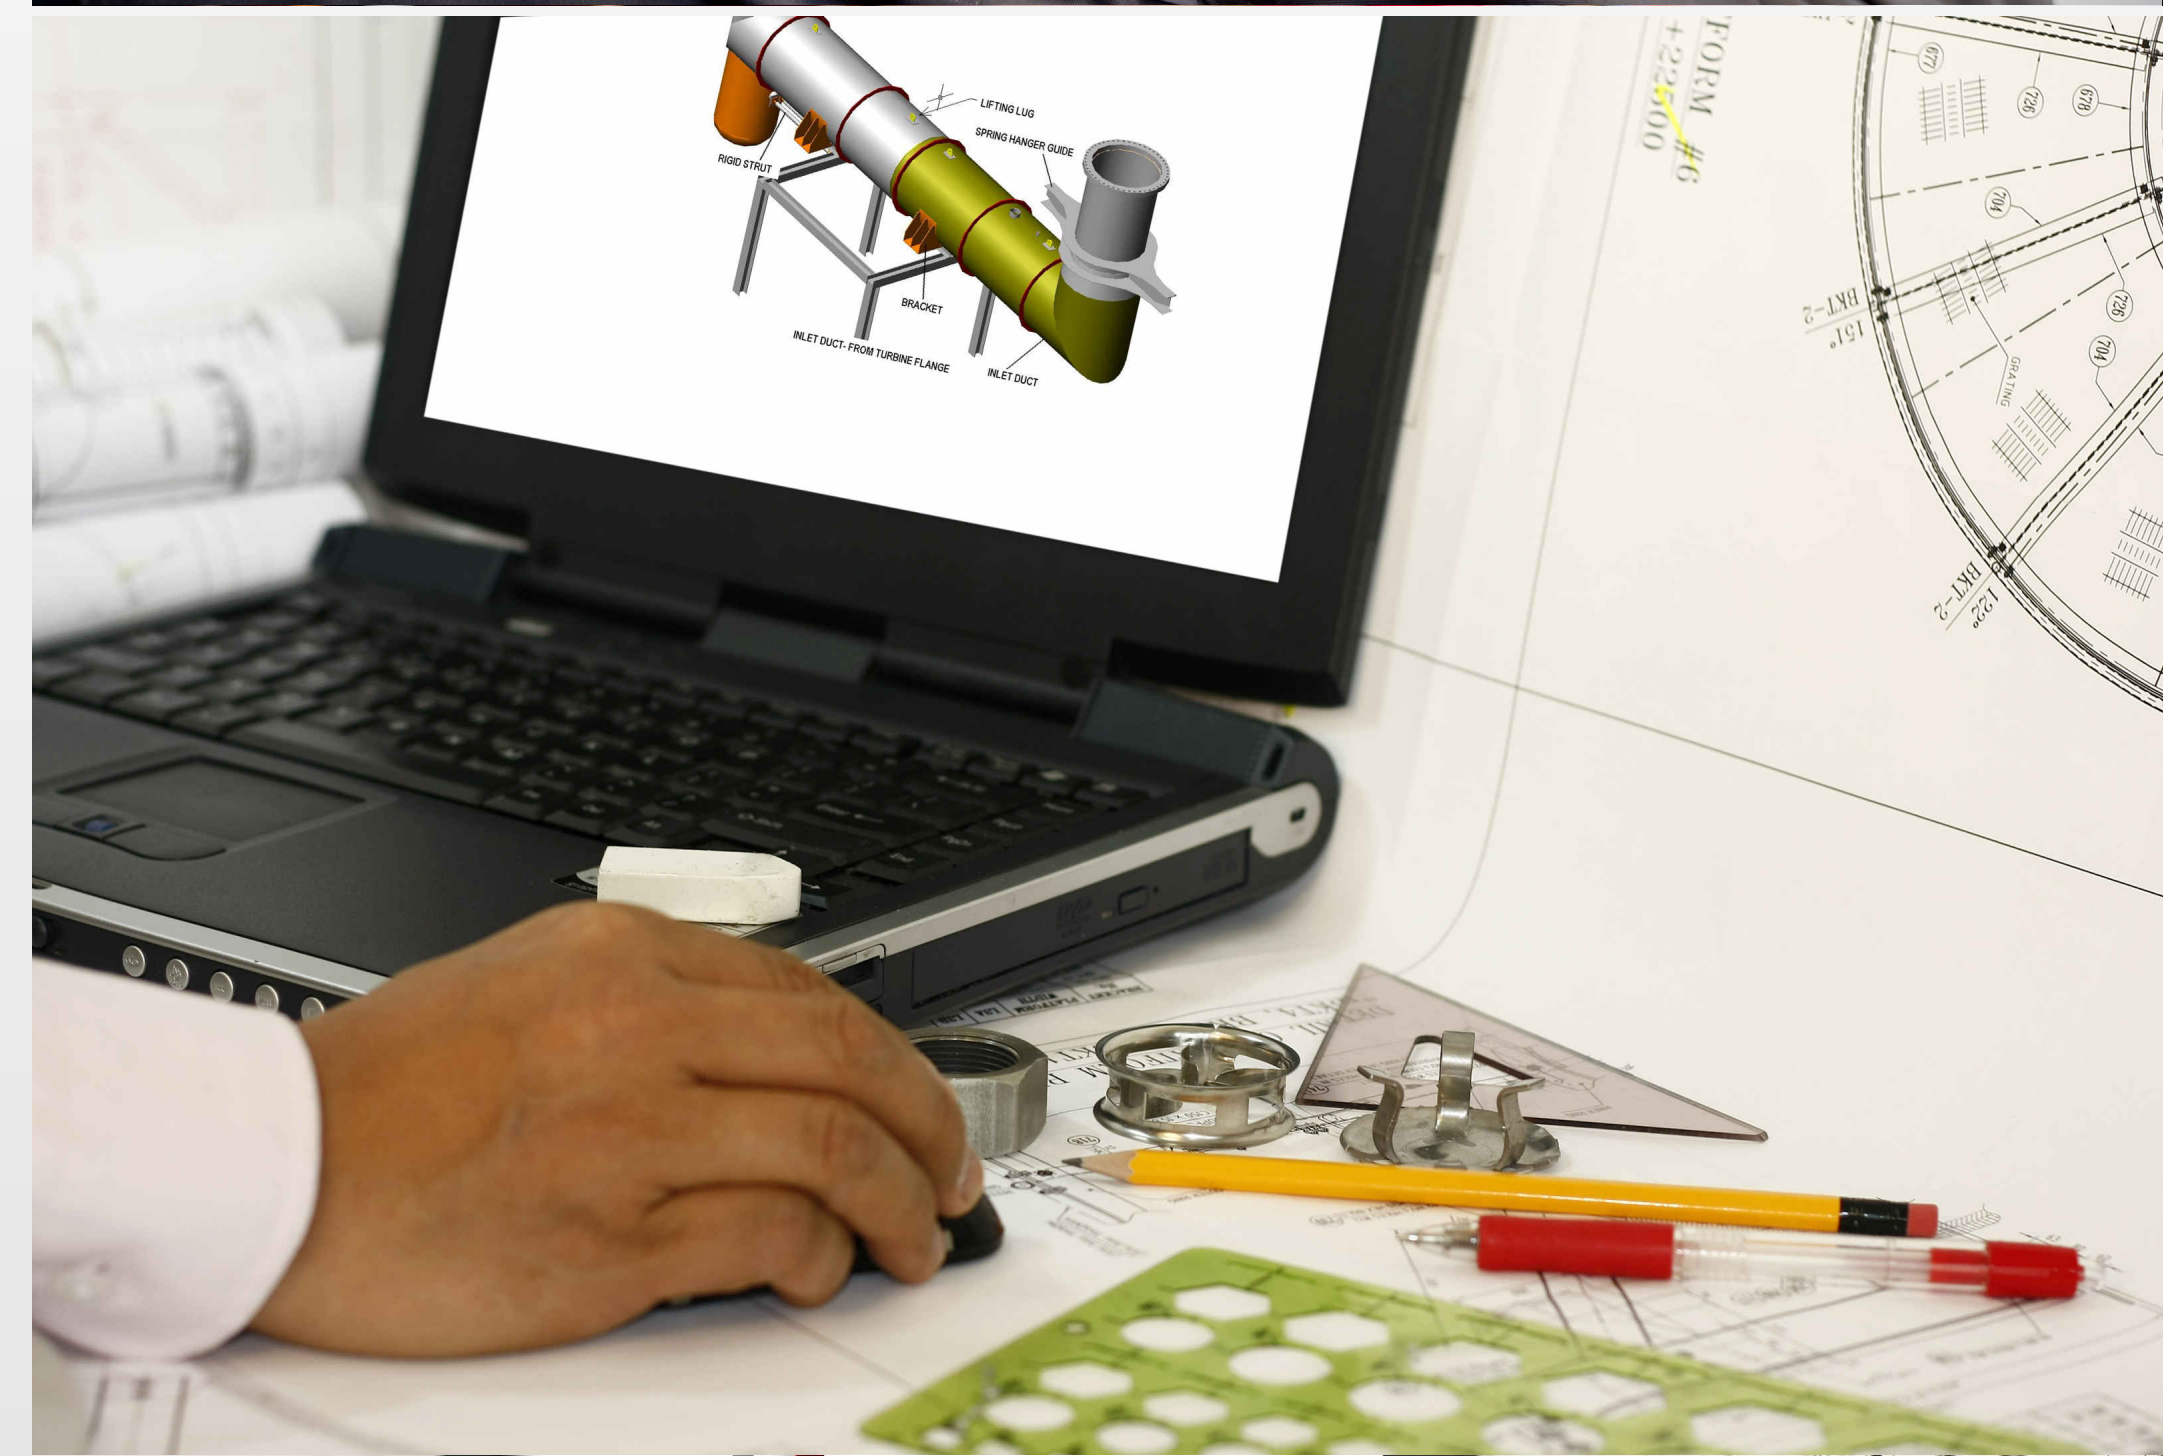

- galvanizing
- hot dip galvanizing

Designing Activities

Based on your requirements and design proposals, we will prepare complete production documentation for you, including BOMs.

If required, we will also provide a certified structural analysis.

Logistics

We provide customers with our comprehensive transportation service from loading to delivery to the destination.

Why UNIMONT – VMS?

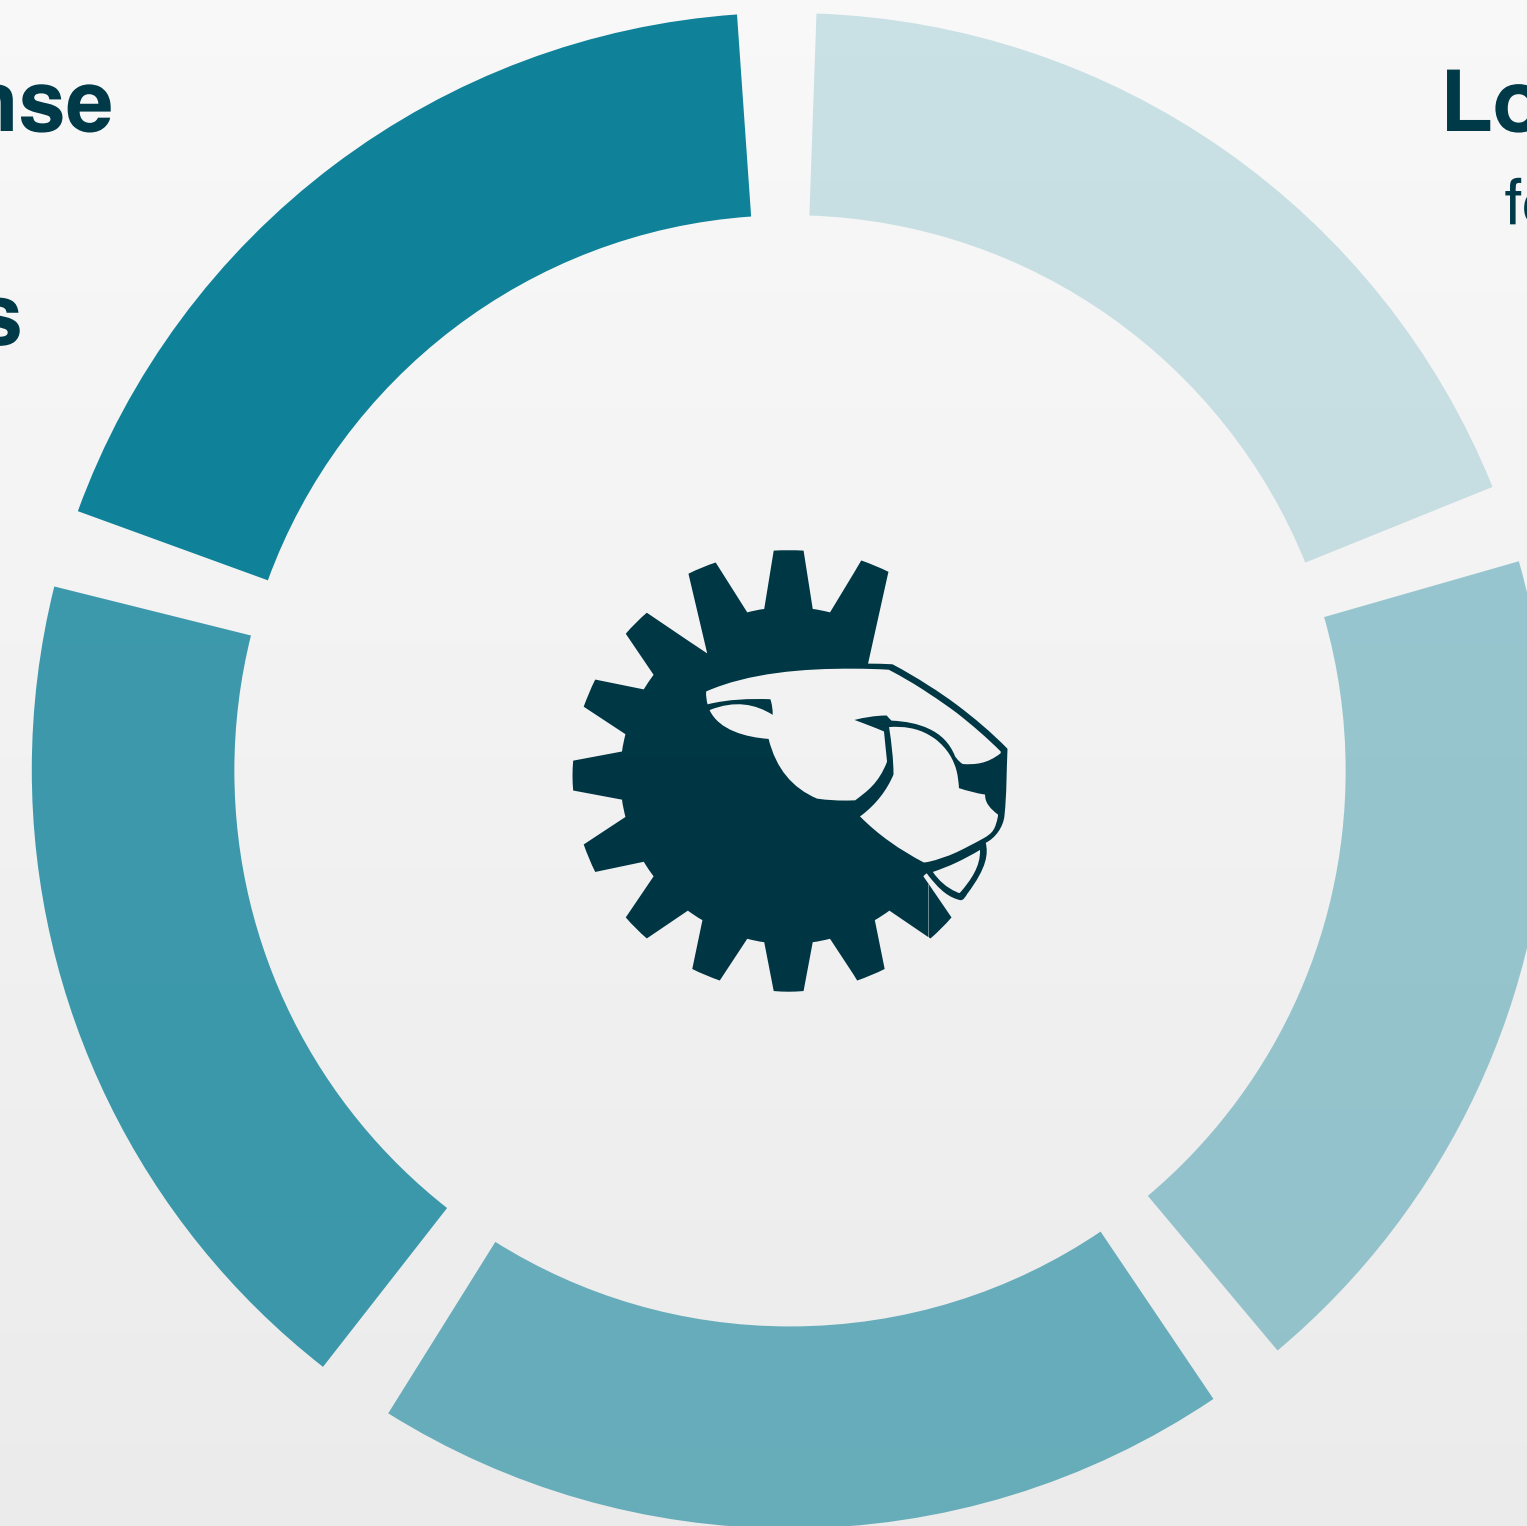

**Flexible response
to customer
requirements**

Longtime experience
for more than 30 years ...

**Choice
of complete
solutions**

**Individual
approach**

**Quality approved
certificates**
